

Come and meet us at the CSF Society Conference in Barcelona! Don't miss the chance to connect with our attending colleagues and learn more about the clinical performance of different synaptic biomarkers in neurodegenerative diseases and chronic conditions. Go check-out the Data Blitz presentations and gain some insights into our newly developed prototype assays.

ADx' POSTERS & BLITZ PRESENTATIONS

Format	Title	Presenter
Poster 7 Thurs 27 (13:30-14:30 + coffee breaks) Data Blitz presentation Fri 28 (8:30-10:00)	Plasma SNAP25 increases in preclinical stages of Alzheimer's disease and associates strongly with APOE(ε4) carriership.	Shreyasee Das PhD student
Poster 8 Thurs 27 (13:30-14:30 + coffee breaks)	A sensitive ELISA for quantification of DOPA decarboxylase in cerebrospinal fluid	Megan De Pauw Junior Scientist
Data Blitz presentation Fri 28 (8:30-10:00)		Julie Goossens Senior Scientist
Poster 29 Thurs 27 (13:30-14:30 + coffee breaks)	Synaptic markers are increased in patients with Status Epilepticus not only in CSF but also in serum	Julie Goossens Senior Scientist
Data Blitz presentation Fri 28 (8:30-10:00)		Eugeen Vanmechelen CSO & Founder ADx

CONTRIBUTIONS TO RESEARCH: ADx INSIDE

Format	Title	Presenter
Presentation Thurs 27 (15:20-15:30)	A novel single molecule array immunoassay for the detection of DOPA Decarboxylase in CSF, Plasma and Serum	Katharina Bolsewig Amsterdam UMC
Presentation Thurs 27 (15:10-15:20)	Cerebrospinal fluid levels of VAMP-2 and SNAP-25 are associated with executive function in dementia with Lewy bodies, an effect that is cofounded by Alzheimer comorbidity	Alba Cervantes González Olivia Belbin IIB Sant Pau

OTHER FUJIREBIO ATTENDEES

Format	Title	Presenter
Presentation Thurs 27 (13:30-13:45)	From CSF to blood and beyond the current biomarkers – the future is now	Nathalie Le Bastard Fujirebio Europe
